Association of Embryo Technology in Europe

Subject: Help improve support for Embryo Transfer profession

**Dear Colleagues and members of the European Association of Embryo
Technology – AETE**

We wanted to let you know that we will shortly be conducting a study into Bovine Embryo Transfer and, as a professional with an interest in this subject, we would like to understand your opinion and perception of the current status of E.T. practise in Europe.

The study is being sponsored by AETE and Vetoquinol; we have commissioned Beehive Research (www.beehiveresearch.co.uk) to conduct the survey on our behalf in order to guarantee the quality and objectivity of the results.

The findings of the study will be used to develop future communication and support activities that benefit the profession as a whole, and will be communicated in the next AETE meeting in Bath. As a valued member of the E.T. community we really appreciate your views. We assure you all responses will remain confidential and findings will be reported in the aggregate only, for this reason we are using an independent research agency.

In the next week or so, you should receive an email invitation to the study from Beehive Research, so please look out for it and we would really appreciate your support in completing it.

Kind regards,

Urban Besenfelder
